STUDENT TEAM WEEKLY REPORT

PROJECT / FEATURE	TEAM & MENTOR	WEEK / LEADER
Question Bank & Quiz Engine [Module 7 — Analytics and Reports UI]	**TEAM ID: 2** **FACULTY MENTOR:** Mr. Rudragouda Patil	**WEEK ENDING:** 06/09/2026 **STUDENT LEADER:** Shrushti Salgar

WORK COMPLETED	CHALLENGES / RISKS	HELP NEEDED
Author Results Interface • Reviewed the Student Quiz Results & Grades section. • Refined the presentation of score/marks and status/grade information. • Organized the results section with a refresh control. **Course Assessment Analytics** • Worked on the existing Course Assessment Analytics & Question Insights interface. • Refined the display of course average score and percentage-based performance information. • Organized the analytics section within the author dashboard. **Report Export Interface** • Reviewed the Export Course Marksheet (CSV) control. • Improved the placement and consistency of reporting controls within the author dashboard. **Dashboard Navigation** • Reviewed the Results & Analytics navigation items. • Maintained consistency between the author dashboard's results and analytics sections.	**Analytics Display:** The interface depends on the availability of result data. **Status:** UNDER REVIEW **Result Readability:** Score and grade information must remain clear and easy to review. **Status:** UNDER REVIEW	• Sample result data for verifying analytics displays. • Integration-team support for checking result refresh and CSV export interactions.

INTEGRATION AND COLLABORATION
• Coordinated the results and analytics UI requirements with the integration team. • Reviewed the presentation of result information across the author dashboard.

COMMON KPI EVIDENCES
• Student Quiz Results & Grades section available. • Course Assessment Analytics & Question Insights section available. • Course average score display included. • Export Course Marksheet (CSV) control available.

NEXT WEEK COMMITMENTS	MENTOR RESPONSE
Review the existing login security and audit-log interfaces. Refine the administrator's audit-log filtering and display. Review the frontend feedback shown for login failures.
