STUDENT TEAM WEEKLY REPORT: MODULE 3

PROJECT / FEATURE	TEAM & MENTOR	WEEK / LEADER
Question Bank & Quiz Engine [Bulk Question Import, Authentication & User Management]	**TEAM ID:** 3 **FACULTY MENTOR:** Mr. Rudragouda Patil	**WEEK ENDING:** 16/08/2026 **STUDENT LEADER:** Sumegh Bhamre

WORK COMPLETED	CHALLENGES / RISKS	HELP NEEDED
• **User & Role Management:** Fixed Admin and Student role handling; implemented and validated Admin user management for Student, Moderator, Exam Author/Teacher and Admin roles. • **Authentication & Password Management:** Completed forgot-password and password-reset functionality; implemented and verified secure password handling and storage. • **Audit Logging:** Updated audit-log handling for authentication and administrative actions; added and verified logout timestamp/audit information. • **Bulk CSV Question Import:** Developed a Java/OpenCSV utility for bulk importing descriptive questions into PostgreSQL with subject, unit, topic and faculty mapping and database validation. Imported 693/693 rows (0 skipped, 0 failed). Verified Question → Topic → Unit → Subject → User relationships via SQL joins.	• **CSV Dependency/Classpath Issues:** Conflicts involving OpenCSV, Apache Commons Lang and PostgreSQL JDBC. Action: Resolved dependency and classpath configuration. **GREEN (RESOLVED)** • **Missing Master Data/FK Mapping:** Missing database master data and unit/topic foreign-key mapping during CSV import. Action: Added required master data and corrected foreign-key mappings. **GREEN (RESOLVED)** • **Missing Faculty Records:** Faculty records referenced by the CSV were not present. Action: Added missing faculty records prior to import. **GREEN (RESOLVED)**	**Technical & Integration Guidance:** Request the Integration team to verify whether the pending work items have been completed according to the requirements, and whether the implemented algorithms and backend logic are appropriate and up to the expected standard.

INTEGRATION AND COLLABORATION
Database Team: Coordinated on user/role mappings, audit-log structure, and subject → unit → topic → question relationships.
Integration/Frontend Teams: Coordinated on backend requirements and API/UI expectations.
Branching: Backend work maintained separately from main on the dedicated backend branch.
COMMON KPI EVIDENCES
Import Accuracy: 100% successful import accuracy achieved with no skipped or failed records.
Automation: 100% automated CSV-based question ingestion for the validated import workflow.
Data Integrity: Database relationships verified successfully through SQL joins.
Continuous Delivery: Backend changes maintained on a dedicated branch.

NEXT WEEK COMMITMENTS	MENTOR RESPONSE
• **PDF Export:** Implement PDF export for question-bank and generated question-paper data. • **Question Paper Export & Download:** Extend export functionality with structured question-paper formatting and required metadata. • **Question Bank Analytics:** Add backend analytics/aggregation for question counts by subject, unit/topic, question type, difficulty/BTL level and author.
